

Certified Logistics Technician Training

The logistics and supply-chain industry is growing quickly in Georgia, **creating good-paying job opportunities in factories, warehouses, distribution centers and transporters.** The Certified Logistics Technician (CLT) Program is an industry-led training and certification. As a program graduate, you will have the knowledge and skills needed to start a successful career in the logistics industry.

Program participants earn both the foundational-level Certified Logistics Associate (CLA) and the mid-level Certified Logistics Technician (CLT) certifications.
